

*Hands-free parking.
Drivers just park and go.*

Skymeter Financial GPS Parking Solutions

With reduced expenses and flexible pricing features Skymeter can make an immediate impact on your bottom line.

Increase Revenue

Skymeter's fully automated parking payment system maximises revenue by providing immediate and complete coverage of all of your parking inventory. Precise satellite location measurements are cross referenced with your custom database of parking spaces to maintain a 24/7 data feed for each and every location. Skymeter records all transactions and informs the parking service operator who in turn bills the driver.

Replace or interoperate with legacy infrastructure

Reduce Expenses

Skymeter FGPS* makes road side hardware obsolete. Parking tickets can also be a thing of the past with infractions being automatically billed to the vehicle account.

Features

- accurate, automated parking data feed
- parking inventory database creation
